

## Needs & wants List (Hematology)

Diseases	<ul style="list-style-type: none"><li>• Hematological malignancies</li><li>• Diseases related to hematology</li></ul>
Object	<ul style="list-style-type: none"><li>• Seeds</li><li>• Targets, concepts</li><li>• Related technologies</li></ul>
Seeds	<ul style="list-style-type: none"><li>• Novel substances that can be potential therapeutic drug candidates for hematological diseases</li><li>• Substances that have innovative characteristics compared with existing drugs</li><li>• Exceptions:<ul style="list-style-type: none"><li>➤ Substances whose mechanism of action is not clear</li><li>➤ Substances for which the structure of the active form has not been determined</li></ul></li></ul>
Targets	<ul style="list-style-type: none"><li>• Targets that can be used in the treatment of hematological diseases</li><li>• Unpublished targets are desirable</li></ul>
Related technologies	<ul style="list-style-type: none"><li>• Highly original assays that can be used to screen drug candidates for hematological diseases</li><li>• In silico assays to predict efficacy, safety and pharmacokinetics in humans</li><li>• Exceptions:<ul style="list-style-type: none"><li>➤ Assays that use mammals or that are based on cell death</li></ul></li></ul>
