## **Nippon Shinyaku Received the Highest "A" Rating in "Climate Change" category and "A-" Rating in "Water Security " category of the CDP**

**Kyoto, Japan, January 13, 2026** - Nippon Shinyaku Co., Ltd. (Nippon Shinyaku; Headquarters, Kyoto; President, Toru Nakai) announced that it has received the highest "A" rating in the "Climate Change" category and an "A-" rating in the "Water Security" category, indicating a leadership level, for 2025 from the Carbon Disclosure Project (CDP), an international environmental non-profit organization.

Nippon Shinyaku has identified "Strengthening efforts to protect the global environment" as one of our issues of materiality and is engaged in "Climate change countermeasures," "Promoting resource circulation," "Conserving biodiversity," and "Contributing to food waste reduction."

In terms of Climate change countermeasures, we are promoting the switch to renewable energy for electricity consumption, the use of renewable energy through the installation of solar power generators, the reduction of energy consumption through equipment upgrades such as the replacement of lighting fixtures with LED lights, and the transition to low-carbon energy by introducing hybrid company-owned vehicles, all in accordance with the scientifically based greenhouse gas emission reduction targets\* certified by the Science Based Targets initiative (SBTi). In addition, in Promoting resource circulation, as part of our measures for water resources, we are striving to reduce wasteful water use through water conservation and to manage wastewater quality in accordance with legal regulations.

\* [News Release on January 26, 2024](#)

We believe that these initiatives and the high level of transparency in information disclosure have led to the acquisition of an "A" and "A-" rating. We will continue our environmental conservation activities and aim to realize a sustainable society.

**About the Carbon Disclosure Project (CDP)**

CDP is an international non-profit organization that encourages companies and municipalities to disclose environmental information in three categories: climate change, water security, and forest resources. It sends questionnaires to major companies around the world regarding these three categories and scores their responses based on governance, disclosure of risks and opportunities, business strategy and performance. The scores are rated on an eight-level scale from the highest "A" to the lowest "D-" and the results are disclosed.
