

## Needs & wants List (Hematology)

Diseases	• Hematological malignancies
	• Diseases related to hematological malignancies
Object	• Seeds
	• Targets, concepts
	• Related technologies
Seeds	• New substances that can be potential therapeutic drug candidates for hematological diseases
	• Substances that have innovative characteristics compared with existing drugs
	• Exceptions:
	➤ Substances whose mechanism of action is not clear
	➤ Substances for which the structure of the active form has not been determined
Targets	• Targets that can be used in the treatment of hematological diseases
	• Unpublished targets are desirable
Related technologies	• Highly original assays that can be used to screen drug candidates for hematological diseases
	• In silico assays to predict efficacy, safety and pharmacokinetics in humans
	• Exceptions:
	➤ Assays that use mammals or that are based on cell death
